Arabian Profile Co. Limited

The Burj Al Arab Hotel at 321metres tall is truly giant. At the time of construction it was the 15th tallest building in the world, and in addition was the single tallest structure standing on a manmade island. It has become an icon for Dubai.

The design of the interior architecture called for unconventional materials and highly specialised structures, which required high performance products to be fabricated.

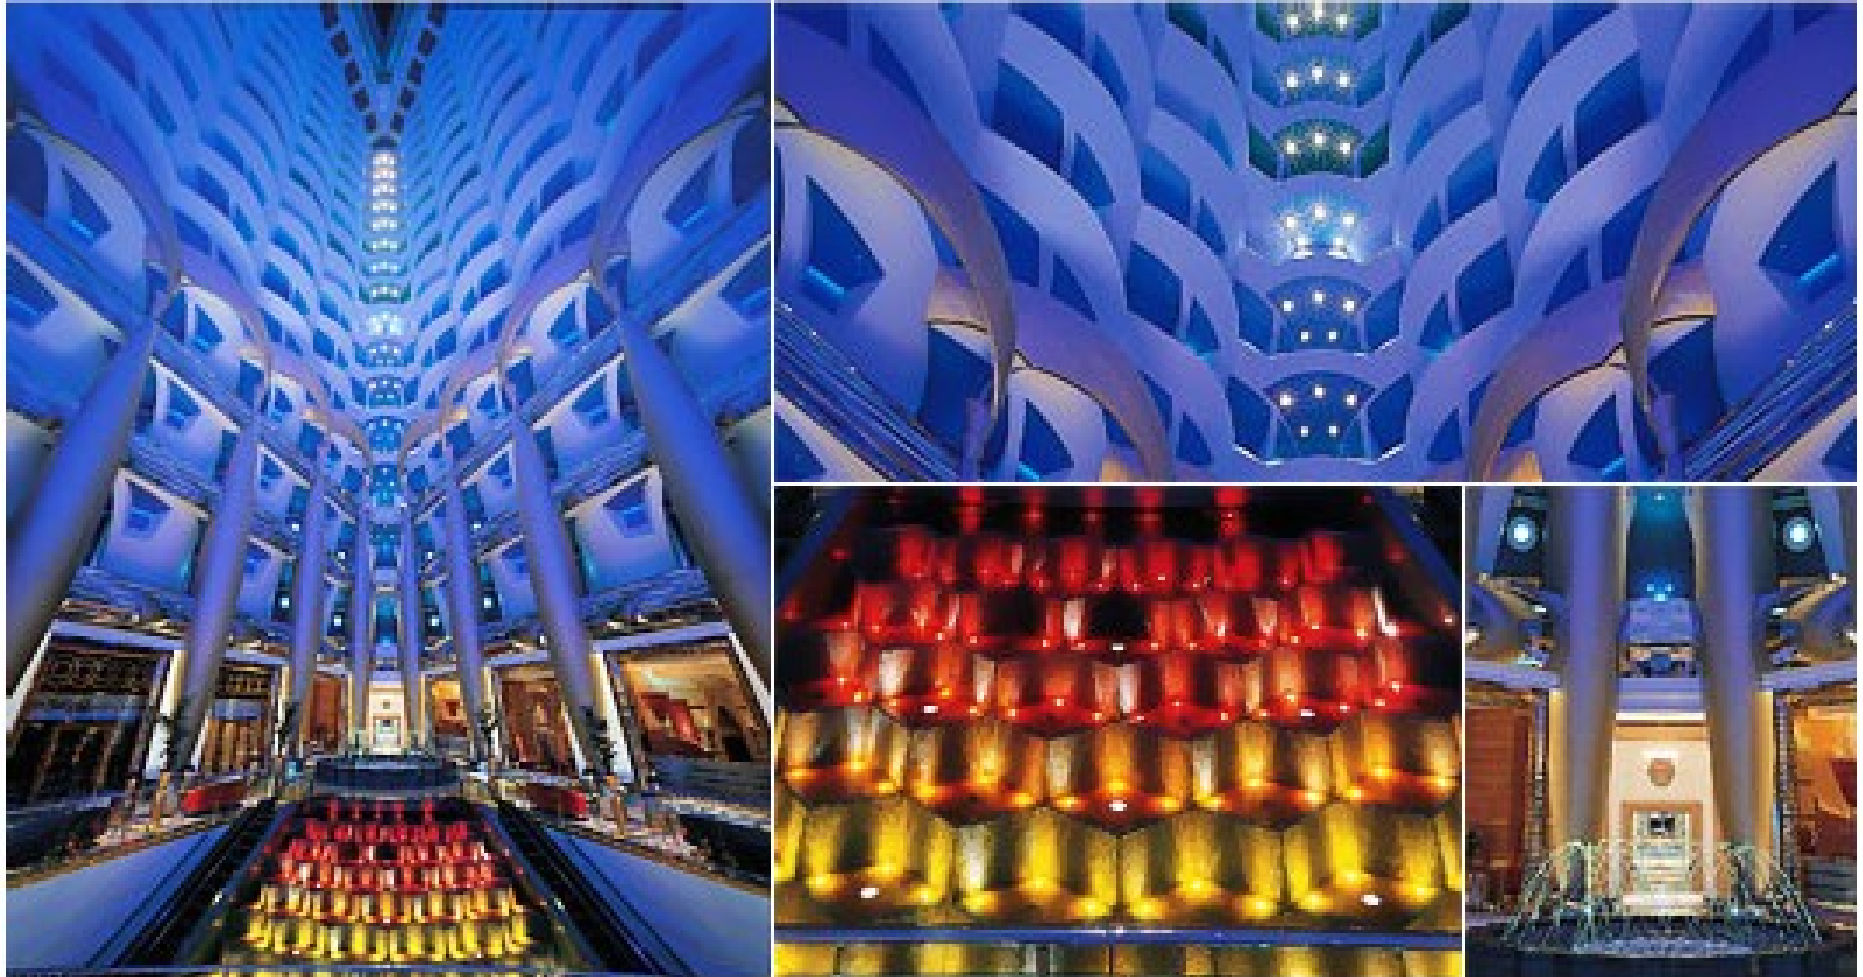

Arabian Profile's reputation, knowledge, experience and innovative thinking in this highly specialised field allowed the Architectural and Design Consultants a freedom of design to express their creativity to extreme.
